1. In the approval flow you added entries that were able to identify information such as file name and file content. What are these called?

1 / 1 point

☒ Dynamic Content

✔ Correct

Correct! The list of Dynamic Content entries appears automatically when the cursor is in certain areas of the flow.

☐ Fields

2. Think of a process in your own organization which could be streamlined and improved by using power automate.

1 / 1 point

Write two or three sentences outlining the key aims of the flow and then note the key stages that it would need to include.

The goal of this flow is to automate the leave request and approval process for employees. Instead of manually emailing requests and waiting for manager approval, Power Automate will streamline the workflow by notifying managers instantly and tracking approvals in a shared database. Key Stages of the Flow: Employee submits a leave request through Microsoft Forms or SharePoint. Power Automate triggers an approval request and sends it to the manager via Microsoft Teams or Outlook.

Feedback

Great! Thank you for your answer. There are so many processes that Power Automate can improve and streamline, and it's very good to start noticing opportunities where you could apply the impact of Power Automate.
