Build a button flow

Of course we have an app -- the Power Automate mobile app! From this app, you can access these features:

- Activity Feed
- Browsing
- Buttons
- Managing Flows

First, you'll need to download and install the Power Automate mobile app from your app store.

After it's installed, start it and sign in.

When you first start the app, you'll see the Activity Feed. The Activity Feed is the place to see what's happening with your flows. It won't be the full experience you'd expect from your PC, but it will show you useful details.

For example, you'll see a flow's last activity. You can see whether the flow succeeded or failed. If it failed, you'll see which step it failed on.

Create a button flow

Buttons are flows that are started through a manual action. For example, you can create a button to send a *Working from home today* email to your manager. If you live far from your workplace, you can then use this button on days when the traffic is a mess!

- Select **Buttons** to use some of these flows.
- Select **Browse** to check out templates for more button flows that you can add to your collection.

Steps to create a button flow

To show you how you can use buttons, we'll use the **Send myself a reminder in 10 minutes button** template.

Note: The screen images are shown at a reduced size to allow easier navigation through the steps of this exercise. The images are presented in a larger size after these steps, in the *Screens* section of this reading.

1. Select **Browse**.
2. Select the **Send myself a reminder in 10 minutes button** flow.

3. Select **Use this template**.

4. Select **Create**, and then select **Done**.

5. Select **Buttons** to see the new flow.

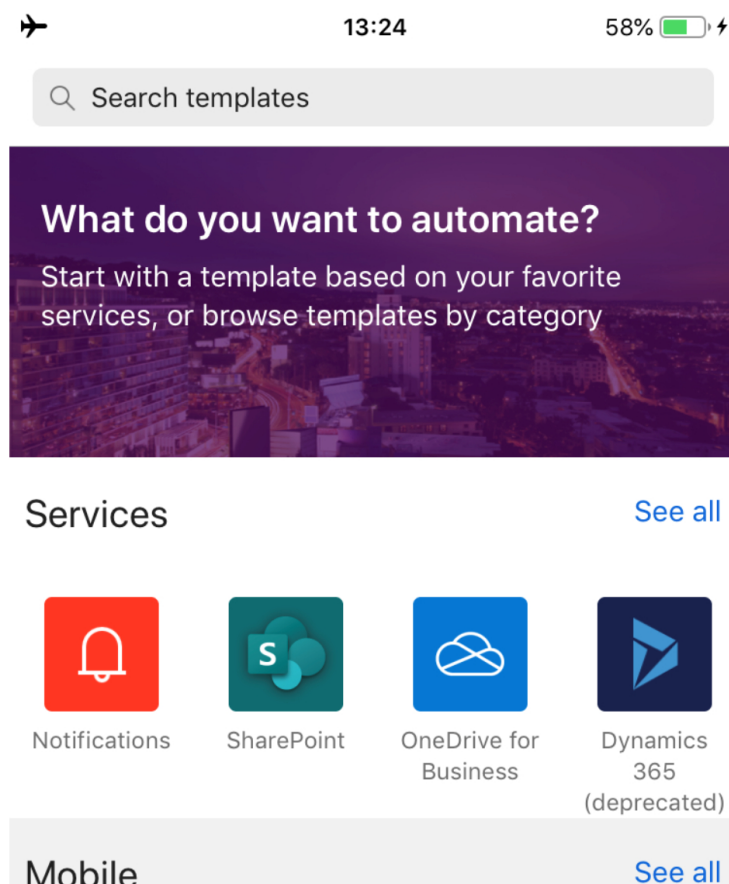

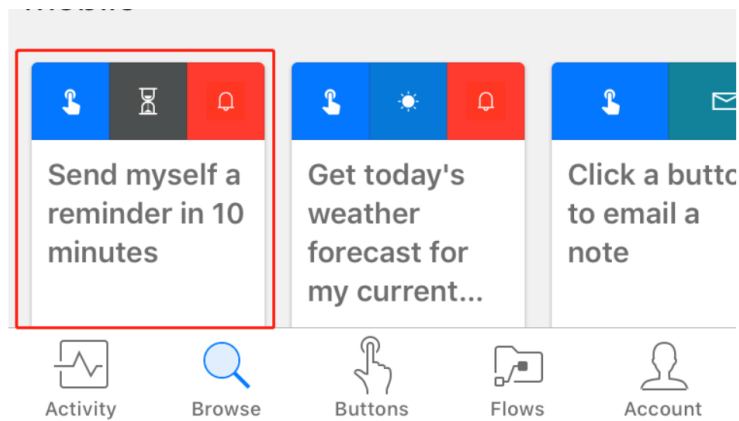

6. Select the flow. In 10 minutes, you will get a reminder.

Screens

Images below are larger versions of the screens used in the exercise steps. The images are titled with the number of the step. For instance, Screen 2 occurs at Step 2.

Screen 2

Screen 3

Send myself a reminder in 10 minutes

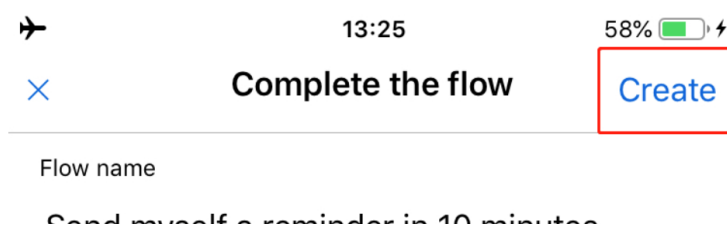

Use this template to send yourself a custom delayed reminder which can be triggered with a button tap - for example, when you are close to completing a meeting or when you step into the office.
