1. Which of the following statements is true in relation to the apps that you build on the Power Apps Platform? Select all that apply.

1 / 1 point

☒ The Power Apps that you build can be accessed on multiple devices.

☒ **Correct**

Correct! The apps that you build in Power Apps can be viewed on different types of devices including laptops, tablets, and mobile phones.

☒ You can give others access to the apps by sharing them.

☒ **Correct**

Correct! The apps you build on the Power Apps platform also cloud based and as a result, you can share them with others.

☐ You need to have some basic knowledge of code to build the apps.

2. Power Apps can connect to systems and data that your organization already has in place. Which of the following data sources can you connect to when building Power Apps?

1 / 1 point

☐ Tables created in Office 365 stored in local drives.

☒ SharePoint

☒ **Correct**

Correct! SharePoint sites are cloud based and Power Apps integrates naturally with them to use the data stored on them.

☒ Dynamics 365

☒ **Correct**

Correct! Dynamics 365 is cloud-based. If your company holds a license for Dynamics 365 and uses it day-to-day, you can use its data in apps by connecting with one of the built-in data connectors.

3. When you are creating a Canvas App, which of the following steps should you do first?

1 / 1 point

☐ Add Data Sources

☐ Drag and drop controls.

☒ Choose a screen size.

☒ **Correct**

Correct! You start by choosing between a tablet or mobile screen size and the Canvas App design screen creates the correct blank screen from which to build.

4. You intend to build a model-driven app and need it to be available to users on both a laptop screen and a mobile phone. Which of the following statements is true?

1 / 1 point

☒ You do not need to tell the app what screen the user will be using.

☐ One of the steps in creating the app is to specify the screen size.

☐ You will need to create two versions of the app to use on different screens.

☒ **Correct**

Correct! Model-driven apps are responsive, which means that they adjust to different screen sizes automatically as they are being used.

5. Which of the following statements is true in relation to Power Apps portal? Select all that apply.

1 / 1 point

☐ The Power Apps Portal can be used to give users access to data on local drives.

☒ The Power Apps interface allows you to customize a website by dragging and dropping.

☒ **Correct**

Correct! You can use the same drag and drop techniques when designing the Portal website that you use when designing the other apps.

☒ With Power Apps portal you can build a website.

☒ **Correct**

Correct! Using the Power Apps interface, you can build an anonymous or authenticated website.

6. Which of the following activities can you add to your apps using A-I features? Select all that apply.

1 / 1 point

☒ Count the objects in an image.

**Correct**

Correct! The Object Detector component identifies and counts objects from an uploaded image or taken photo.

☒ Extract information from a business card.

**Correct**

Correct! One of the built in A-I components is a business card reader which can identify an image as a business card and extract the relevant information.

☐ Classify Text by its formatting.
