Power BI & Power Virtual Agents > Module 1 > Install a template app

< Previous Next >

Install a template app

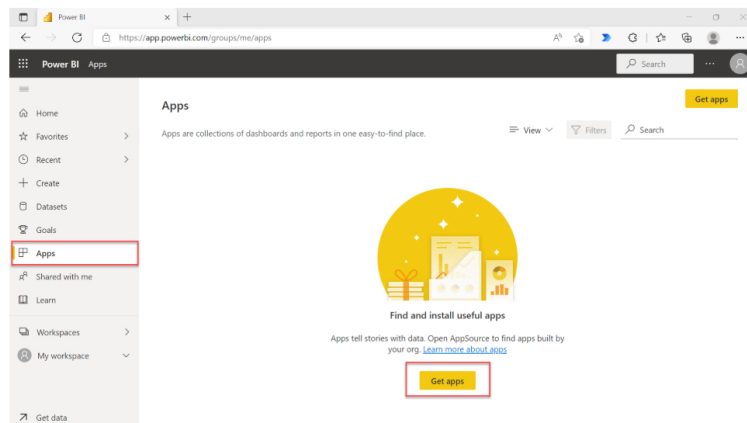

The new Power BI *template apps* enable Power BI partners to build Power BI apps with little or no coding and deploy them to any Power BI customer. As a Power BI partner, you create a set of out-of-the-box content for your customers and publish it yourself.

You can build template apps that allow your customers to connect within their own accounts. As domain experts, they can unlock the data in a way that is easy for their business users to consume.

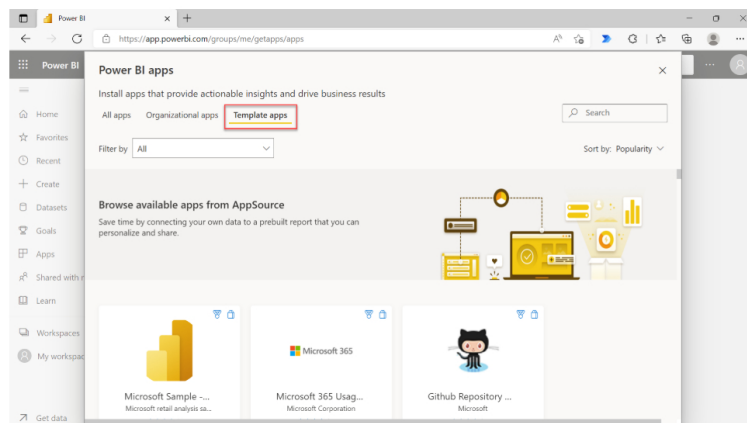

Template apps are submitted to the Partner center to become publicly available in the [Power BI Apps marketplace](#) and on [Microsoft AppSource](#). If you're interested in creating template apps yourself for distribution outside your organization, see [Create a template app in Power BI](#).

Install a template app

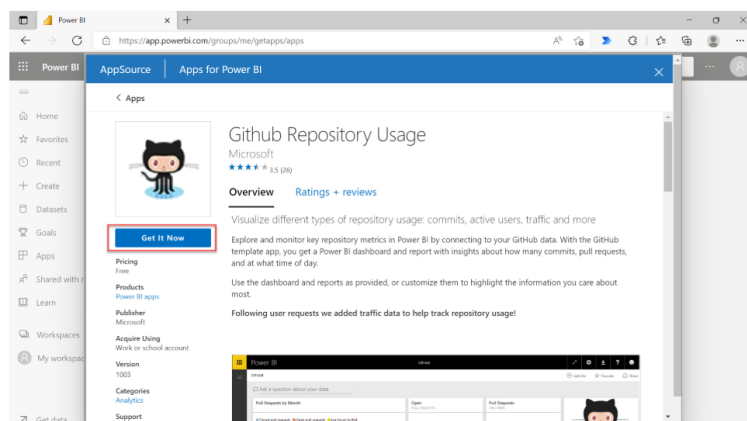

1. In the nav pane in the Power BI service, select **Apps > Get apps**.

2. In the Power BI apps marketplace that appears, select **Template apps**. All the template apps available in AppSource will be shown. Browse to find the template app you're looking for, or get a filtered selection by using the search box.

3. When you find the template app you're looking for, click it. The template app offer will display. Click **Get It Now**.

4. In the dialog box that appears, select **Install**.

Apps may contain security or privacy risks. Only install apps from trusted authors and sources.
[Learn more](#)

By installing this app I agree to the publisher's [privacy policy](#) and [terms of service](#)

Install

Cancel

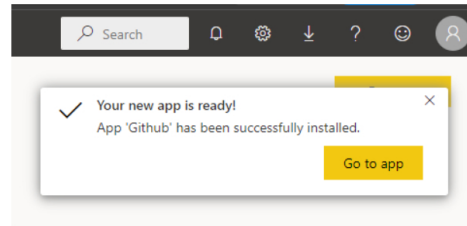

The app is installed, along with a workspace of the same name that has all the artifacts needed for further [customization](#).

Note

If you use an installation link for an app that isn't listed on AppSource, a validation dialog box will ask you to confirm your choice.

To be able to install a template app that is not listed on AppSource, you need to request the relevant permissions from your admin. See the [Template app settings](#) in Power BI admin portal for details.

When the installation finishes successfully, a notification tells you that your new app is ready.
