1. Which of the following elements in the canvas app do you use to control which columns of data are shown and how they are formatted?

1 / 1 point

- ☐ The Form Control
- ☒ The Gallery Control

✔ Correct

Correct! The Gallery control displays data from a table. This allows you to control which columns are shown and how they are formatted.

2. In Canvas Apps, you can use functions to instruct your app to do which of these actions?

1 / 1 point

- ☐ Extract information from an image.
- ☒ Change the format of the information such as the color.

✔ Correct

Correct! You could use a function like RGBA to change the color of an element on the canvas app screen.

- ☒ Show users only the valid values for a given column

✔ Correct

Correct! You would use the Distinct function to customize a control in this way.

3. In the details screen of the app, you are viewing the information in a form. If you want to customize the fields in this screen, what would be the right sequence of steps:

1 / 1 point

- ☐ Use the Drag and Drop method.
- ☒ Tree View, DetailsScreen1, Edit Fields

✔ Correct

Correct! Taking this series of steps, will give you access to the full list of data source items. If there were some that were not added by default, you can add them from here.

4. Which of the following describes what a control is?

1 / 1 point

- ☐ An element which controls how data is used to generate the app.
- ☒ A Control is a user information that provides an action or shows information.

✔ Correct

Correct! There are many types of controls including labels, text-input boxes, dropdown lists and navigation elements.

5. When you share an app which of the following statements are true in relation to security? Select all that apply.

1 / 1 point

- ☒ If you make changes to a shared app and publish all users will see the changes.

✔ Correct

Correct! If you make and save changes to a shared app, when you publish the app again the changes are pushed out to all users.

- ☒ By default, users will only be able to view and use the app.

✔ Correct

Correct! When you share the app users will be granted standard User permission which only allows them to view and use the app.

- ☒ If you share an app with a security group, everyone in the group will have the same access.

✔ Correct

Correct! If you share an app with a security group, existing members that group and anyone who joins it will have the permission that you specify for that group.

6. Co-owners of an app can do which of the following? Select all that apply.

1 / 1 point

- ☒ Edit the app

✔ Correct

Correct! A co-owner can make changes and update an app.

- ☐ Change the owner of the app

- ☐ Delete the app.

☒ Share the app.

**Correct**

Correct! A co-owner can share the app.
