1. In the exercise you customized the venue feedback screen to get an overall score for the venue. In the FX bar at the top of the screen, what did the formula to create the overall score look like?

   1 / 1 point

   ☑ TextInput1+TextInput2

   ⊘ **Correct**
   Correct! The contents of the two text boxes were added together simply by naming them and using the plus syntax.

   ☐ =TextInput1+TextInput2

2. When you created a conditional color format on the result in the text box, what functions did you need to add to the formula in the properties box?

   1 / 1 point

   ☐ The IF function by itself.

   ☑ The IF function combined with the Value function.

   ⊘ **Correct**
   Correct! The value function identified the value in the text box and the IF took the result and worked with it.
