1. Your company recently expanded and moved into new markets. At the same time, the internal structure of the company was reorganized so staff are working in unfamiliar areas. They have also been set new targets and goals.

The management team are understandably concerned that so much change will have affected turnover and efficiency. What can you do to provide the overview that they need to understand the effects on sales and staff performance?

   1 / 1 point

○ Use Power Virtual Agents to generate a chatbot to get customer feedback.

◉ Use Power BI to capture and analyze data from Dynamics 365 and other internal data tables and generate a report.

○ Use Power Automate to generate automated feedback forms for staff.

> ⊘ **Correct**
> Correct! Power BI can summarize and analyze the data from multiple sources to report on company metrics and present them as easy-to understand visuals.

---

2. You are implementing Power Platform in the organization that you work for. The company uses Office 365 and Salesforce as its CRM. Which one of the following statements is true about how the company data can be accessed by the Power Platform apps and workflows?

   1 / 1 point

○ Information can be brought in from Office 365, but you will need to build a custom connector for Salesforce.

○ Information can be brought in from both sources with no additional licensing requirements.

◉ Information can be brought in from both sources, but additional licenses may be required.

> ⊘ **Correct**
> Correct! Power Platforms has connectors for both Office365 and Salesforce. However, because the connector for Salesforce is a premium connection, it will require additional licensing.

---

3. In the company you work for, the system for booking leave was very informal and as a result, there were problems with staff not having their leave approved. To make this process smoother and more efficient you automated it using a Power Automate flow. When the staff member gets an email saying that their leave is approved, what is that an example of?

   1 / 1 point

○ A Trigger

◉ An Action

○ A Function

> ⊘ **Correct**
> Correct! Actions are events that happen in the flow that are prompted by the user or a trigger.

---

4. You have created two new custom tables in the Dataverse to keep track of company projects and the staff assigned to each project. Each project could have several employees assigned to it. In addition, an employee could be assigned to work on more than one project at a time. When you use these tables in the business solutions you create what type of relationship would exist between them?

   1 / 1 point

○ One-to-Many

◉ Many-to-Many

○ Parent-Child

> ⊘ **Correct**
> Correct! Because multiple rows in both tables are linked to multiple rows in the other table, a many-to-many relationship exists between them.

---

5. The company that you work for has office based in multiple locations including the USA, Europe, and Asia. You are coordinating the implementation of Power Platform across the organization. What facts about environments do you need to keep in mind? Select all that apply.

   1 / 1 point

☑ The Power Platform solutions in each geographic location will be separate.

> ⊘ **Correct**
> Correct! All items created in an environment are bound to that environment's location.

☐ All the offices will have access to the same centralized Dataverse database.

☑ Your company already uses Microsoft Azure Active Directory, and this can control access to the Environments also.

> ⊘ **Correct**
> Correct! The company uses Azure Active Directory for the company tenant and the environments will be created under that.

be created under that.

6. One of your colleagues has created a solution using the Accounts table which is one of the standard tables in Microsoft Dataverse. They added a column called Date Confirmed but accidentally selected a text format for the column so it will not work in the way they planned. They would like to know how to delete this column. What would you recommend they do?

1 / 1 point

- ⦿ Use the built-in Date column and ignore the one that they have created.
- ◯ Delete the column for them in the Data section of the Power Admin Center.

> ⊘ **Correct**
> Correct! You cannot delete a column in a standard table though you can rename it.

7. Now that Power Platform has in use your organization, you intend to use the Power Platform Admin Center to manage it going forward. What administrative and management tasks will you be able to use it for? Select all that apply.

1 / 1 point

- ☑ Create a New Environment

> ⊘ **Correct**
> Correct! Within the Admin Center you can view all existing environments and also create a new one.

- ☑ Restrict which connectors users have access to.

> ⊘ **Correct**
> Correct! If you go to the Data policies section, you can set up policies that restrict which data connectors can be used with Microsoft Dataverse.

- ☐ Create a second Dataverse Database within the environment.

8. The staff in your department visit customers regularly and the manager would like them to have an app that they can use to check company stock and inventory information. She does not have any strong feelings about the design but the key factor is that staff all use different devices when they are on the road so they might view the app on a laptop, tablet, or mobile. The information needs to be clear, regardless of the device they are using to access the app. With this in mind, which type of app would you suggest that you build?

1 / 1 point

- ◯ Portal app
- ◯ A canvas app
- ⦿ A model-driven app

> ⊘ **Correct**
> Correct! Model-driven apps are responsive, which means they adjust to different screen sizes as your colleagues are using the app.

9. A manager in your organization wants to recreate an app that they saw another sales manager using at a sales conference. They will be using the app on a mobile. They want the app to show the detailed sales results from their team which they currently track in a spreadsheet on the local drive of the laptop. In the future, they might also want the app to show information from two SharePoint lists. What problem would you immediately need to point out to them?

1 / 1 point

- ⦿ All their data sources need to be in the cloud.
- ◯ Power Apps can only connect to one data source at a time.
- ◯ They will need an additional license for connecting to SharePoint.

> ⊘ **Correct**
> Correct! Power Apps can connect to multiple data sources, but they all need to be cloud based.

10. You are designing an app which will allow staff to record and track business contacts. They would like it to be able to automatically extract information from business cards. How can you add this to the app?

1 / 1 point

- ◯ Train and use an Object Detection model in your app with AI Builder.
- ⦿ Use one of the ready-to-use AI components that comes with Power Apps.
- ◯ Add a camera control to the app.

> ⊘ **Correct**
> Correct! Power Apps already contains an A-I component called the business card reader which you can incorporate into the app.
