1. When you changed the app to show different details in the text boxes on the first screen of the app, which command did you need to use?

| | 1 / 1 point |

○ Navigate

◉ ThisItem

   ⊘ **Correct**

   Correct! The ThisItem function followed by the column name controls the information displayed in the text box.

2. When you had created the app and before you made any adjustments, which of the two screens that the user would be able to see, showed the detailed information for a single event?

| | 1 / 1 point |

◉ The Second Screen

○ The First Screen

   ⊘ **Correct**

   Correct! The second screen, the Details screen, shows you all the information from a single row of the data source. In this case it showed you the details of a single event.
